Pollution Under Control Certificate

FOR PETROL / CNG/ LPG/ VEHICLES ONLY

[Approved by Department of Transport, No. B/P
Government of Rajasthan, Jaipur]

It is certified that the vehicle No..... Make conforms the emission level of exhaust to the standards prescribed under Rule 115(2) of Central Motor Vehicles Rules, 1989. This Certificate is valid upto.....

S.No.	Type of Vehicle	Co%	Before Setting	After Setting	*HC PPM	Before Setting	After Setting
1	2 & 3 – Wheelers (2/4 Stroke) (Vehicles manufactured on and before 31 st March 2000)	4.5			9000		
2.	2&3–Wheelers (2-Stroke) (Vehicles manufactured after 31 st March 2000)	3.5			6000		
3.	2 & 3 – Wheelers (4 Stroke) (Vehicle manufactured on and after 31 st March 2000)	3.5			4500		
4.	Bharat Stage – II Compliant 4 Wheelers	0.5			750		
5.	4-Wheelers other than Bharat Stage – II compliant	0.3			1500		

* The Idling emission standards for vehicles when operating on Compressed Natural Gas (CNG), shall contain Non-Methane Hydrocarbon (NMHC) in place of Hydrocarbon (HC) and shall be estimated by the following formul.

$$\text{NMHC} = 0.3 \times \text{XHC}$$

Where HC= Total hydrocarbon measured as n-Hexane equivalent

Similarly Idling emission standards for vehicles when operating on Liquefied Petroleum Gas. (LPG), shall contain Reactive Hydrocarbon (RHC) in place of Hydrocarbon (HC) and shall be estimated by the following formul.

$$\text{RHC} = 0.5 \times \text{XHC}$$

Where HC= Total hydrocarbon measured as n-Hexane equivalent

(In case of any Complaint, Please write to Transport Commissioner, Govt. of Rajasthan,
Sahkar Marg, Jaipur)

Pollution Under Control Certificate

FOR DIESEL VEHICLES ONLY

[Approved by Department of Transport,
Government of Rajasthan, Jaipur]

It is certified that the vehicle No..... Make..... conforms the emission level of exhaust to the standards prescribed under Rule 115(2) of Central Motor Vehicles Rules, 1989. This Certificate is valid upto.....

Method of Test	Maximum Smoke Density	Before Setting	After Setting
Free acceleration test for turbo charged Engine and naturally aspirated Engine	65 Hartridge Units 2.45 Light absorption coefficient (I/m)		

Note :- 1. "Mass emission standards for vehicles when operating on Compressed Natural Gas (hereinafter in this rule referred to as "CNG") shall be the same as are applicable for gasoline vehicles with the exception that HC shall be replaced by Non-Mathane hydrocarbon (NMHC) = 0.3 X HC"

2. "Mass emission standards for vehicles when operating on Liquefied Petroleum Gas (hereinafter in this rule referred to as "LPG") shall be the same as are applicable for gasoline vehicles with the exception that HC shall be replaced by Reactive hydrocarbon (RHC), where RHC=0.5xHC"
